

DOSATRON®

WATER POWERED DOSING TECHNOLOGY

**Anti-Tamper Protection for your Dosatron
water powered injector**

NEW

-  **Secures your dose rate settings**
-  **Prevents unauthorised access**
-  **Tamper resistant**
-  **Helps control chemical usage & costs**
-  **Fits Dosatron D25 & D3 ranges, DI.1500, DI.16, DI.110, D8RE-2 & D8RE-5**
-  **Easy to install**
-  **Made from high impact strength polypropylene**
-  **Replacement lock & key sets also available**

DOSATRON®

WATER POWERED DOSING TECHNOLOGY

INSTRUCTION SHEET

The **DOSA LOCK** is designed for use with Dosatron units with small or large injector stem diameters as shown in the table below:-

DOSATRON RANGE	INJECTOR STEM DIAMETER	
	SMALL	LARGE
D25	D25RE-2	D25RE-5, D25RE-10
D3	D3RE-3000, D3RE-2	D3RE-5, D3RE-10, D3RE-25IE
DI	DI.1500, DI.16	DI.110
D8	-	D8RE-2, D8RE-5

For units with small diameter injector stems, the **DOSA LOCK** is ready to use and can simply be fitted and secured using the lock & key supplied as in Fig. 1 (right).

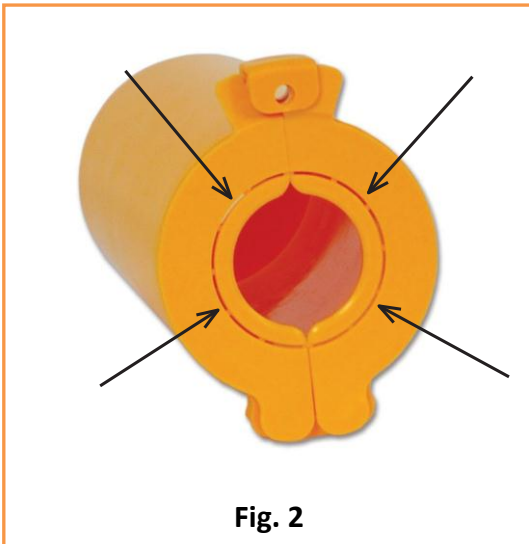

Fig. 2

For models with large diameter injection stems, use a utility knife to cut the perforated line (Fig. 2, left) to modify the diameter of the **DOSA LOCK** aperture and then fit and secure the **DOSA LOCK** using the lock and key supplied (Fig. 1, right).
