

Irrigation & Agriculture

Water Meter, Model IRT

Special design with free water passage allows measurement of water with high contents of impurities.

- **Applications**
Irrigation and sewerage metering
- **Available Sizes**
3" - 10" (80mm - 250mm)

Features:

- Negligible head loss
- Simple maintenance
- Field replaceable measuring unit
- Hermetically sealed register with glass lens
- Bearings are constantly flushed during operation to eliminate deposit of solids
- Optional electrical output: EV (Volume) or EF (Rate of Flow)
- Compatible with Dialog automatic reading system

Technical Specifications

Maximum Working Pressure	16 bar
Maximum Liquid Temperature	60°C
Body	Cast iron, polyester coated
Connection	Flanges according to ISO, BS 10, ANSI 150 or others
Register	M3, U.S. Gallon, cu.ft, ML Central pointer or 3 pointers

IRT type dial

200	8	900	450	30	18	10 ⁷	10		
250	10	1400	750	70	20	10 ⁸	100		

Head Loss Curve

Installation Requirements

- The meter can be installed in any position (horizontal, vertical or inclined)
- The meter must be always full of water while operating
- Prior to the installation of a new meter, the pipeline must be flushed out
- Straight pipe section of the same diameter D as the meter, having length of 10D and 5D shall be installed upstream and downstream of the meter respectively
